Research Papers

A.R. Aitken, R.E. Sandeman and D.C. Sandeman (Australia)
Preparation of immunoperoxidase-labelled wholemounts of invertebrate brains (NSM 00700) 1

V.W. Yong and S.U. Kim (Canada)
A new double labelling immunofluorescence technique for the determination of proliferation of human astrocytes in culture (NSM 00708) 9

F.W. Tse, L. Marin and H.L. Atwood (Canada)
Focal labeling of axonal terminals with active synapses recorded by an extracellular macro-patch electrode (NSM 00710) 17

F. Condé (France)
Further studies on the use of the fluorescent tracers Fast blue and Diamidino yellow: effective uptake area and cellular storage sites (NSM 00711) 31

E.A. Heinicke, J.A. Kiernan and J. Wijsman (Canada)
Specific, selective, and complete staining of neurons of the myenteric plexus, using Cuprolinic blue (NSM 00712) 45

R.G. Smith (U.S.A.)
Montage: a system for three-dimensional reconstruction by personal computer (NSM 00705) 55

M. Diana, M. Garcia-Munoz and C.R. Freed (U.S.A.)
Wire electrodes for chronic single unit recording of dopamine cells in substantia nigra pars compacta of awake rats (NSM 00715) 71

G.K. Harvey, K. Schindheim, J.H. Antony and J.D. Pollard (Australia)
Linear response curves from an ELISA assay: measurement of anti-myelin IgG and IgM during experimental allergic neuritis (NSM 00709) 81

Special Issue:
Novel Approaches to the Study of Motor Systems

Foreword v

Acknowledgements vi

C. Capaday and R.B. Stein (Canada)
A method for simulating the reflex output of a motorneuron pool (NSM 00718) 91

C.M. Chanaud, C.A. Pratt and G.E. Loeb (U.S.A.)
A multiple-contact EMG recording array for mapping single muscle unit territories (NSM 00720) 105

A.H. Cohen (U.S.A.)
Effects of oscillator frequency on phase-locking in the lamprey central pattern generator (NSM 00743) 113

R. Eckmiller (F.R.G.)
Computational model of the motor program generator for pursuit (NSM 00721) 127

E. Eidelberg, A.L. Miller, R.J. Schwartzman and G.M. Alexander (U.S.A.)
Measurements of regional glucose metabolism in studies of motor control (NSM 00722) 139

C. Gravel, N. Leclerc, J. Rafrafi, R. Sasseville, L. Thivierge and R. Hawkes (Canada)
Monoclonal antibodies reveal the global organization of the cerebellar cortex (NSM 00723) 145

R.I. Griffiths (Canada)
Ultrasound transit time gives direct measurement of muscle fibre length in vivo (NSM 00724) 159

W. Herzog (Canada)
Individual muscle force estimations using a non-linear optimal design (NSM 00725) 167

0165-0270/87/$03.50 © 1987 Elsevier Science Publishers B.V. (Biomedical Division)

J.M. Hollerbach and C.G. Atkeson (U.S.A.)
Inferring limb coordination strategies from trajectory kinematics (NSM 00726) 181
S. Homma, Y. Nakajima, T. Musha, Y. Okamoto and B. He (Japan)
Dipole-tracing method applied to human brain potentials (NSM 00727) 195
J.C. Houk, D.A. Dessem, L.E. Miller and E.H. Sybirska (U.S.A.)
Correlation and spectral analysis of relations between single unit discharge and muscle activities (NSM 00728) 201
M. Hulliger, F. Horber, A. Medved and A. Prochazka (Switzerland and U.K.)
An experimental simulation method for iterative and interactive reconstruction of unknown (fusimotor) inputs contributing to known (spindle afferent) responses (NSM 00729) 225
G.E. Loeb, W.J. Yee, C.A. Pratt, C.M. Chanaud and F.J.R. Richmond (U.S.A. and Canada)
Cross-correlation of EMG reveals widespread synchronization of motor units during some slow movements in intact cats (NSM 00730) 239
A.D. McClellan (U.S.A)
In vitro CNS preparations: unique approaches to the study of command and pattern generation systems in motor control (NSM 00731) 251
T.R. Nichols (U.S.A.)
A technique for measuring the mechanical actions of heterogenic (intermuscular) reflexes in the decerebrate cat (NSM 00732) 265
M.J. O'Donovan (U.S.A.)
Development approaches to the analysis of vertebrate central pattern generators (NSM 00733) 275
E. Otten (The Netherlands)
A myocybernetic model of the jaw system of the rat (NSM 00734) 287
M. Shimamura, V.R. Edgerton and I. Kogure (Japan and U.S.A.)
Application of autoradiographic analysis of 2-deoxyglucose in the study of locomotion (NSM 00735) 303
T. Sinkjaer and J.A. Hoffer (Canada)
A computer-controlled system to perturb the ankle joint of freely standing cats trained to maintain a given force (NSM 00736) 311
J.C. Smith and J.L. Feldman (U.S.A.)
In vitro brainstem-spinal cord preparations for study of motor systems for mammalian respiration and locomotion (NSM 00737) 321
S.S. Smith and J.K. Chapin (U.S.A,)
A paradigm for determination of direct drug-induced modulatory alterations in Purkinje cell activity during treadmill locomotion (NSM 00738) 335
H. Wolf and K.G. Pearson (Canada)
Intracellular recordings from interneurons and motoneurons in intact flying locusts (NSM 00739) 345
